

Developmental Psychology: The Developmental Context

By Gary Elliott

GRIN Verlag GmbH Jul 2014, 2014. Taschenbuch. Book Condition: Neu. 211x146x4 mm. Neuware - Seminar paper from the year 2013 in the subject Psychology - Developmental Psychology, Atlantic International University, language: English, abstract: The family system is the primary context for the child's development and undoubtedly has the greatest impact. The nature-nurture debate continues with regards the human development but this paper focuses its attention on the child's development within its family dynamic; how the child learns to socialise within the family social system and how social issues in the broader sense impact on the child's development. Beyond the primary context of the family, social interactions in the child's peer group and the schooling environment aid in moulding his social development. The impact of the school environment and peer group selection will be discussed in the course of this paper. In addition to the school environment, children make use of media devices and media input more than they did a decade ago and this may also have a profound impact on the child's perceptions of themselves and the world around them; ultimately steering their development in a particular direction. The importance and influence of family...
